Editorials:**AYURVEDA & COVID-19**

Vyadhi kshamtava is one of the important concepts explained by ancient acharyas of Ayurveda. The concept mainly deals with resistance to the various types of diseases and quick recoveries if any disease occurs. Acharya explained this process of immunology by using words like *vyadhi pratibandhkatwa* and *Vyadhi Utpad virodhitwa*.

At the outset of Covid 19 pandemic the importance of Vyadhikshamatwa is again underlined and its need in the form of emerging treatments is best utilized to prevent and control the pandemic. Still more research work required in this area.
