**Editorials:****“Panchbhautik Chikitsa: Reedy to Futuristic Challenge’s”**

This concept involves inter-pretention of scientific knowledge, and disease management approach on the background of *panchabhautik Chikitsa*. While treating patients, *Ayurveda* does not emphasize on labeling diseases but given due importance to causative factors, *samprati* etc and analysis on the basis of different *siddhanta* in *Panchabhautik chikitsa* like *Prakruti Vinishay* (from Birth Date), *Panchamahabhuta Nirmiti & Vilinikaran Siddhanta*, *Amla-Kshar Siddhanta* & most important to diagnosis confirmation test *Udar-Parikshan*. This help to treat many complicated medical conditions which has no cure with modern medicines.

For most complicated conditions which have just symptomatic management by allopathy, have great hopes with *Ayurvedic* treatment for its cure by applying *Panchbhautik siddhanta*. The present day today symptomatic patients are successfully treated by *Ayurveda* and have given encouraging results for future practice.

Founder of *Panchabhauthik Chikitsa Bruhatrayiratna vaidyaraj Aatmaram Vaman Datarshastri* & his followers are treated more than thousands of cases every year very successfully.

*Panchabhauthik Chikitsa* is one of the great *chikitsa* of *Ayurveda* which may help every *Ayurveda* practitioner to accept diagnostic and therapeutic challenges.
